

Play value

„The best preparation for maths is not practising maths, but climbing trees,” says renowned neurobiologist Gerald Hüther. Climbing connects both sides of the brain and promotes motor, cognitive and social skills. In addition, children learn to take responsibility in a playful way. With the Net Pyramid, we experience these phenomena. In addition, its interesting design attracts attention from afar. The three-dimensional net structure of the equipment provides children with a variety of challenges and stimulates their creativity. The Net Pyramid can be climbed, scaled, and explored.

Order No. 13.01000 Small Net Pyramid.

Order No. 13.01001 Optionally available element

Order No. 13.02000 Middle Net Pyramid. The Photo shows the basic equipment incl. all optionally available installation elements.

It enables children to experience height and creates tactile sensations to their hands and feet. In addition, the equipment offers attractive seating for resting, observing, and talking, e.g., if supplemented by our optional hanging seats. Different levels and paths, which encourage a wide variety of movement and role-playing games, also promote concentration and dexterity.
