

Play value

The chimney slide is a piece of equipment for particularly skilful and daring children. The platform can only be reached via the chimney or the two climbing poles and is thus primarily suitable for older children and young people. This makes the platform a popular meeting place for retreating, enjoying the view and chatting in peace. For younger and older children alike it is lots of fun to swiftly get away on the long wave slide.

Surfacing requirements corresponding to a fall height of ≤ 3.00 m (please refer to price list for more detailed information)

Foundations

Chimney and firemen's poles

4 items 50 x 115 x 60 cm
Excavation depth 80 cm

Slide

1 item 70 x 30 x 30 cm
Excavation depth 70 cm

Attention:

Exact measurements may vary; for all installation dimensions refer to current assembly instructions.

Technical changes reserved.

7.78000

Technical information

Equipment made of non-impregnated mountain larch

Core-free

Sawn-timbers core-free, thus decreasing occurrences of cracking and undesired changes in shape

Tongue and groove

Tongue and groove planks made of 4 cm solid wood, highly resilient, no trickling of dust / sand, protection against direct rain

Hardwood rungs

Climbing rungs made of hardwood (ash) Ø 4.2 cm, milled and mortised, secured against twisting, easy to grip and not cold for children to touch

Ground anchor

All parts used for anchoring to the ground are made of hot-dip galvanised steel or stainless steel

For more detailed explanation of the quality characteristics see price list.

Firemen's poles made of stainless steel, Ø 42 mm, glass-bead blasted

Slide made of stainless steel, glass-bead blasted, 2-mm-thick sliding surface with higher sides 2.5 mm
