| Instructions for wear checks of play equipment  | The equipment must be checked for correct operation and safety, especially the points listed below: | Proof of maintenance            |
|---|---|---------------------------------|
| Playground  | Mechanics   |                                 |
| Date of installation  | Check object frame – must be freely rotatable on the light incidence axis.                          |                                 |
| Checks depend on the type of equipment. Any equipment with moving parts must be checked at least twice a year, static equipment at least once a year. | Check bearing – must not move too smoothly, i.e. fast swing must be prevented (risk of injury).     |                                 |
| Intervals for maintenance work and checks generally depend on   | Check vertical bearings within the post – must move smoothly.                                       |                                 |
| - location  | Prism   |                                 |
| - usage   | 4. Check that prism sits firmly in the fixture.   |                                 |
| <ul><li>frequency of use</li><li>possible vandalism</li></ul>   | Check the inside of the prism – must be free of condensation.                                       |                                 |
| For more details see also our general instructions for maintenance of   | Stainless steel   |                                 |
| playgrounds!  | 6. Clean with stainless steel spray (www.kim-tec.de) using a clean cloth.                           |                                 |
|   | Glass   |                                 |
| Glass Prism<br>Order No. 10.31100   | 7. Clean with standard dishwashing liquid using a lint-free cloth.                                  |                                 |
| (4) (5)   | Structural stability  |                                 |
|   | Check the anchoring to the ground once a year.  |                                 |
| 6   |   | Special notes, e.g. for repairs |
|   | Repair not carried out, it is still possible to play on equipment                                   |                                 |
|   | Repair not carried out, equipment is taken out of action  |                                 |
|   | All work carried out, everything is in order  |                                 |
|   | Maintenance carried out by:   |                                 |
|   | Date  |                                 |
